

Hello everyone, and welcome to video #3, where we are going to walk you through how to find this amazing Minecraft: Education Edition BuildAbility world inside of Minecraft. And so, Dan again has all the tutorials for you. So just follow along, and we'll see where we go.

All right, so I'm already logged in here. We're going to click on "Play."

We're going to go over to the "View Library."

Now, just as a quick aside, if you find that you can't get access to the Library, it means that there's a firewall exception missing from your school's system. So you'll need to talk to your IT department about getting those firewall exceptions added so that you can access this area.

Once we are in here, we'll go to "Subject Kits."

We're going to go to "Social Emotional." And here's BuildAbility!

We're just going to click on that and we're going to click "Create World." It's going to pop up, take a few seconds here.

Now just as another quick aside, I'm running on a gaming rig, so this is really quick. On a Chromebook or an iPad, it may be a little slower, so just be patient.

Thank you so much. Once you get in remember to log in with your education credentials, even with the kids.

Again, go to the "Subject Kits," find "Social Emotional," and then click on "BuildAbility" and hit "Play."

Thank you so much for being here. And we'll see you over for the next lesson.
